

## **Assignment 12**

Create an app with 2 activities. One for login and the other for sign up. Each activity should be able to open the other activity. For your login activity add 2 fields, email and password and a login button. For your signup activity add these fields: name, gender, email, phone, password. Gender should be a spinner. Use appropriate input types for each field. Use TextInputLayouts with TextInputEditTexts instead of plain edittexts (10 pts)
